CHANGES IN COUNTRY AND IMPORT COMMODITY CLASSIFICATION EFFECTIVE JANUARY 1, 1965

1. CHANGES IN CLASSIFICATION OF COUNTRIES

<u>Code</u>	<u>Country</u>	<u>Notes</u>
<u>I. Additions:</u>		
312	Aden)	Until January 1, 1965, trade with Aden and the Trucial States was included with British Middle East n.e.s.
328	Trucial States)	
469	Malagasy Republic	Until January 1, 1965, trade with the Malagasy Republic was included with French Africa n.e.s.
<u>II. Revisions in Coverage:</u>		
425	Tanzania	From January 1, 1965, includes trade with Tanganyika and Zanzibar.
462	French Africa n.e.s.	From January 1, 1965, trade with the Malagasy Republic is not included.
<u>III. Changes in Description or Codes:</u>		
416	Malawi	Formerly Nyasaland (Code 422).
424	Rhodesia	Formerly Southern Rhodesia.
428	Zambia	Formerly Northern Rhodesia (Code 419).
933	Greenland	Formerly coded 949.
936	St. Pierre and Miquelon	Formerly coded 954.
<u>IV. Deletions:</u>		
329	British Middle East n.e.s.	Trade with British Middle East n.e.s. now included in trade with Aden and the Trucial States.

2. CHANGES IN IMPORT COMMODITY CLASSIFICATION

I. Additions:

<u>Class</u>	<u>Description</u>	<u>Unit of Quantity</u>	<u>Ex Class</u>
101-39	Refined sugar, cane and beet	Cwt.	101-49
101-48	Refined sugar n.e.s.	Cwt.	101-49
104-75	Soft drink concentrates and syrups	Gal.	104-99
377-65	Rayon-polyester broad woven fabrics n.e.s. ...	Lb.	377-69
377-75	Polyester-cotton broad woven fabrics n.e.s. ..	Lb.	377-79
442-27	Iron and steel powder	Ton	(442-29 446-99)
444-25	Bars, stainless steel, hot rolled	Cwt.	444-30
444-85	Bars, stainless steel, cold drawn or cold finished	Cwt.	444-90
445-23	Carbon steel, hot rolled, for pipes, over 100 inches in width	Cwt.	445-24
445-31	Sheet and strip, carbon steel, hot rolled, up to 12 inches in width n.e.s.	Cwt.	445-32
494-07	Mineral acoustic and ceiling tiles and panels	Sq. yd.	494-09
504-37	Bearings, mounted	\$	504-99
521-35	Combination back hoe and front end loader machines	No.	521-39
551-39	Used tractors	No.	(551-03 551-07 551-17 551-24 551-28)
589-95	Parts of motor vehicles imported under tariff item 950 n.e.s.	\$	(589-25 589-75 589-80 589-85 589-90 589-99)
634-19	Telephone apparatus, equipment and specific parts	\$	639-19
634-90	Radio transmitting-receiving units (excluding parts)	No.	639-99
634-95	Radio and television broadcast and transmitting equipment n.e.s. (excluding parts)	\$	639-99
634-99	Commercial and industrial communication equipment n.e.s. (excluding parts)	\$	(636-99 639-99 771-36)
637-24	Radio receiving sets, automobile, transistor or tube type (excluding parts)	No.	(639-35 639-36)
637-37	Radio receiving sets, transistor type n.e.s. (excluding parts)	No.	639-35

2. CHANGES IN IMPORT COMMODITY CLASSIFICATION (Continued)I. Additions: (Continued)

<u>Class</u>	<u>Description</u>	<u>Unit of Quantity</u>	<u>Ex Class</u>
637-49	Radio receiving sets n.e.s. (excluding parts).	No.	639-36
637-59	Phonograph record players, domestic type (excluding parts)	No.	636-09
637-94	Receiving antennae and mountings (excluding parts)	\$	639-72
639-05	Cabinets for television and radio sets and phonographs	No.	639-99
639-10	Capacitors (condensers), electronic communication type, and parts	\$	639-76
639-15	Resistors, electronic, and parts	\$	639-76
639-20	Crystals (mounted) and holders	\$	639-76
639-30	Power supply units (power packs) and parts ...	\$	(639-99 688-79)

Special transactions—trade	970-10 to 970-99	165
Table 4. Special Transactions—Non-trade		167
Table 5. Value, Price and Volume Indexes of Imports by Sections		172

EXPLANATORY NOTES

1. **Source of Data:** Import statistics are compiled from information appearing on customs import entries and invoices, except for data on electricity. Electricity imports are reported by the importing firms directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Import statistics for any month include all goods declared on import entries received at DBS during the calendar month, and on electricity reports received within the following calendar month. Most import entries reach DBS within a few days of the date that goods enter Canada, and delays rarely exceed one week. Electricity imports are usually included in statistics for the month in which these imports actually occurred.

3. **Coverage:** From January 1, 1964, import statistics have included all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses rather than being cleared on arrival. For 1963 and earlier years import statistics included goods cleared immediately on arrival plus goods cleared for consumption out of customs warehouses. The two types of record eventually cover the same totals, except for a small amount of goods which is entered into customs warehouses and then re-exported. There may, however, be an important difference in the time at which warehoused goods are recorded as imports; some shipments which enter customs warehouses remain there for several months before clearance. A more detailed discussion of this change appears on one of the blue pages included in the January, 1964 issue of this report.

Both in 1964 and in earlier years, import statistics exclude the following commodity movements (some of these are recorded separately as Special Transactions—Non-trade in Table 4 of this report): gold and gold products where the value of the gold content is 80% or more of the total value (except for dental gold alloy which is included in class 880-27, and a small amount of gold scrap in the form of jewellers' sweepings which is included in class 258-99); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada (or brought back by Canadian armed forces or diplomats returning from postings outside Canada); temporary imports for exhibition or competition (and film imported for exhibition or processing or returned after exhibition or processing abroad); ships of British construction and registry imported for use in Canada, and ships and aircraft purchased for use as international carriers but not used to carry goods between points in Canada; bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad; generally, all temporary imports and goods merely moving in transit through Canadian territory.

4. **Countries Credited:** Imports are credited to the country from which the goods were first directed to Canada, except for goods of Central or South American origin consigned to Canada from the United States which are credited to the country of origin.
5. **Quantities:** Tables 3 and 4 show quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. I. Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Units of number refer to the number of complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). "Ton" means 2,000 pounds avoirdupois. "Cwt." means 100 pounds avoirdupois.

6. **Values:** The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but at least in recent years importers have often reported c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics in the following cases: goods subject to dumping duty (from January, 1959); raw cotton and crude petroleum (from January, 1962, retroactive to January, 1960); raw sugar (from January, 1963, retroactive to January, 1961); all shipments individually valued at \$50,000 or more (from January, 1965; when this check was introduced in January, 1964 it covered only shipments individually valued at \$100,000 or more). Only about one-quarter of the value of imports is covered by these specific checks.
7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the Import Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports and published on coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report. Amendments effective in any year are listed in the January report for that year.

Value, Price and Volume Indexes of Imports

This report continues the publication begun in January 1964, of the value, price and volume indexes of imports according to the sections of the new Import Commodity Classification. The first six sections of this classification are represented in the index, and Section VII "Special Transactions Non-trade", which does not enter into the import totals, is excluded. The declared value indexes have been based on a grouping of 1948 values into appropriate sections of the new classification. The price index has been based on a re-arrangement of the individual lines used in calculating the old index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is, as usual, derived by dividing the value index by the corresponding price index. No separate price or volume index can be compiled for Section VI "Special transactions - trade" because of its non-homogeneity.

It should be noted that as of January, 1964, imports include both goods which are cleared by Customs immediately on arrival in Canada and also goods entered into customs warehouses without being cleared for domestic use. This new concept has also been introduced in the value, price and volume indexes but the effect on the indexes is considered to be of minor significance. For an explanation of the new basis of compiling trade statistics, refer to the blue insert in the January, 1964, issue of this report.

The value, price and volume indexes of imports based on the nine main component material groups of the old Statistical Classification—Imports are discontinued with statistics for December 1964.

Table 3. Imports by Commodities and Countries:	

EXPLANATORY NOTES

1. **Source of Data:** Import statistics are compiled from information appearing on customs import entries and invoices, except for data on electricity. Electricity imports are reported by the importing firms directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Import statistics for any month include all goods declared on import entries received at DBS during the calendar month, and on electricity reports received within the following calendar month. Most import entries reach DBS within a few days of the date that goods enter Canada, and delays rarely exceed one week. Electricity imports are usually included in statistics for the month in which these imports actually occurred.
3. **Coverage:** From January 1, 1964, import statistics have included all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses rather than being cleared on arrival. For 1963 and earlier years import statistics included goods cleared immediately on arrival plus goods cleared for consumption out of customs warehouses. The two types of record eventually cover the same totals, except for a small amount of goods which is entered into customs warehouses and then re-exported. There may, however, be an important difference in the time at which warehoused goods are recorded as imports; some shipments which enter customs warehouses remain there for several months before clearance. A more detailed discussion of this change appears on one of the blue pages included in the January, 1964 issue of this report.

Both in 1964 and in earlier years, import statistics exclude the following commodity movements (some of these are recorded separately as Special Transactions—Non-trade in Table 4 of this report): gold and gold products where the value of the gold content is 80% or more of the total value (except for dental gold alloy which is included in class 880-27, and a small amount of gold scrap in the form of jewellers' sweepings which is included in class 258-99); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada (or brought back by Canadian armed forces or diplomats returning from postings outside Canada); temporary imports for exhibition or competition (and film imported for exhibition or processing or returned after exhibition or processing abroad); ships of British construction and registry imported for use in Canada, and ships and aircraft purchased for use as international carriers but not used to carry goods between points in Canada; bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad; generally, all temporary imports and goods merely moving in transit through Canadian territory.

4. **Countries Credited:** Imports are credited to the country from which the goods were first directed to Canada, except for goods of Central or South American origin consigned to Canada from the United States which are credited to the country of origin.
5. **Quantities:** Tables 3 and 4 show quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. I. Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Units of number refer to the number of complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). "Ton" means 2,000 pounds avoirdupois. "Cwt." means 100 pounds avoirdupois.

6. **Values:** The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but at least in recent years importers have often reported c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics in the following cases: goods subject to dumping duty (from January, 1959); raw cotton and crude petroleum (from January, 1962, retroactive to January, 1960); raw sugar (from January, 1963, retroactive to January, 1961); all shipments individually valued at \$50,000 or more (from January, 1965; when this check was introduced in January, 1964 it covered only shipments individually valued at \$100,000 or more). Only about one-quarter of the value of imports is covered by these specific checks.
7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the Import Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports and published on coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report. Amendments effective in any year are listed in the January report for that year.

Value, Price and Volume Indexes of Imports

This report continues the publication begun in January 1964, of the value price and volume indexes of imports according to the sections of the new Import Commodity Classification. The first six sections of this classification are represented in the index, and Section VII "Special Transactions Non-trade", which does not enter into the import totals, is excluded. The declared value indexes have been based on a grouping of 1948 values into appropriate sections of the new classification. The price index has been based on a re-arrangement of the individual lines used in calculating the old index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is, as usual, derived by dividing the value index by the corresponding price index. No separate price or volume index can be compiled for Section VI "Special transactions - trade" because of its non-homogeneity.

It should be noted that as of January, 1964, imports include both goods which are cleared by Customs immediately on arrival in Canada and also goods entered into customs warehouses without being cleared for domestic use. This new concept has also been introduced in the value, price and volume indexes but the effect on the indexes is considered to be of minor significance. For an explanation of the new basis of compiling trade statistics, refer to the blue insert in the January, 1964, issue of this report.

The value, price and volume indexes of imports based on the nine main component material groups of the old Statistical Classification—Imports are discontinued with statistics for December 1964.

Crude materials, inedible	201-10 to 291-99	33
Fabricated materials, inedible	301-10 to 496-99	43
End products, inedible	501-19 to 961-99	109
Special transactions — trade	970-10 to 970-99	205
Table 4. Special Transactions — Non-trade		208
Table 5. Value, Price and Volume Indexes of Imports by Sections		213

EXPLANATORY NOTES

1. **Source of Data:** Import statistics are compiled from information appearing on customs import entries and invoices, except for data on electricity. Electricity imports are reported by the importing firms directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Import statistics for any month include all goods declared on import entries received at DBS during the calendar month, and on electricity reports received within the following calendar month. Most import entries reach DBS within a few days of the date that goods enter Canada, and delays rarely exceed one week. Electricity imports are usually included in statistics for the month in which these imports actually occurred.
3. **Coverage:** From January 1, 1964, import statistics have included all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses rather than being cleared on arrival. For 1963 and earlier years import statistics included goods cleared immediately on arrival plus goods cleared for consumption out of customs warehouses. The two types of record eventually cover the same totals, except for a small amount of goods which is entered into customs warehouses and then re-exported. There may, however, be an important difference in the time at which warehoused goods are recorded as imports; some shipments which enter customs warehouses remain there for several months before clearance. A more detailed discussion of this change appears on one of the blue pages included in the January, 1964 issue of this report.

Both in 1964 and in earlier years, import statistics exclude the following commodity movements (some of these are recorded separately as Special Transactions—Non-trade in Table 4 of this report): gold and gold products where the value of the gold content is 80% or more of the total value (except for dental gold alloy which is included in class 880-27, and a small amount of gold scrap in the form of jewellers' sweepings which is included in class 258-99); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada (or brought back by Canadian armed forces or diplomats returning from postings outside Canada); temporary imports for exhibition or competition (and film imported for exhibition or processing or returned after exhibition or processing abroad); ships of British construction and registry imported for use in Canada, and ships and aircraft purchased for use as international carriers but not used to carry goods between points in Canada; bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad; generally, all temporary imports and goods merely moving in transit through Canadian territory.

4. **Countries Credited:** Imports are credited to the country from which the goods were first directed to Canada, except for goods of Central or South American origin consigned to Canada from the United States which are credited to the country of origin.
5. **Quantities:** Tables 3 and 4 show quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. I. Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Units of number refer to the number of complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). "Ton" means 2,000 pounds avoirdupois. "Cwt." means 100 pounds avoirdupois.

6. **Values:** The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but at least in recent years importers have often reported c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics in the following cases: goods subject to dumping duty (from January, 1959); raw cotton and crude petroleum (from January, 1962, retroactive to January, 1960); raw sugar (from January, 1963, retroactive to January, 1961); all shipments individually valued at \$50,000 or more (from January, 1965; when this check was introduced in January, 1964 it covered only shipments individually valued at \$100,000 or more). Only about one-quarter of the value of imports is covered by these specific checks.
7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the Import Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports and published on coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report. Amendments effective in any year are listed in the January report for that year.

Value, Price and Volume Indexes of Imports

This report continues the publication begun in January 1964, of the value, price and volume indexes of imports according to the sections of the new Import Commodity Classification. The first six sections of this classification are represented in the index, and Section VII "Special Transactions Non-trade", which does not enter into the import totals, is excluded. The declared value indexes have been based on a grouping of 1948 values into appropriate sections of the new classification. The price index has been based on a re-arrangement of the individual lines used in calculating the old index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is, as usual, derived by dividing the value index by the corresponding price index. No separate price or volume index can be compiled for Section VI "Special transactions - trade" because of its non-homogeneity.

It should be noted that as of January, 1964, imports include both goods which are cleared by Customs immediately on arrival in Canada and also goods entered into customs warehouses without being cleared for domestic use. This new concept has also been introduced in the value, price and volume indexes but the effect on the indexes is considered to be of minor significance. For an explanation of the new basis of compiling trade statistics, refer to the blue insert in the January, 1964, issue of this report.

The value, price and volume indexes of imports based on the nine main component material groups of the old Statistical Classification—Imports are discontinued with statistics for December 1964.
